## **Detail Action**

This office action is responsive to the amendment filed on August 8, 2006.

### **Rejection Under 35 U.S. C. 112**

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-8 and 17-20 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The independent claims 1, 17 and 20, now recite that the "eccentricity correction data is recorded in a user data recording area in the same way as handling of the user data". However, applicant fails to describe in the specification the ways of handling of the user data and which way is "the same way".

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-8 and 17-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In the claims 1-8 and 17-20 the phrase "in the same way as handling of the user data" is vague and indefinite, because claimed language does not define what are the ways of handling the user data.

### **Response to Remarks**

Applicant's arguments filed on 2/23/07 have been fully considered but they are not persuasive. Applicant traverse the above rejections under 35 U.S.C. 112. Applicant argue that the specification, on page 25, describes "how the user data is written "in the normal way" (line 3), and how the eccentricity correction data is thus written in the "same way". Applicant also pointed out that page 8 lines 20+ describes that the eccentricity data is written "in the same way as writing of user data". However, the claim does not recite "in the same way as writing of user data" as argued by the applicant, claims recite "same way as handling of the user data" which is not taught in the specification. The specification does not describe how the handling is done because the handling does not appear in the specification.

Applicant further argue that "The "reasonable degree" threshold is met when "those skilled in the art would understand what is claimed when the claim read in light of specification." Applicant alleged that the examiner has not applied this test nor that the examiner asserted that one of ordinary skill in the art would not understand the metes and the bounds of the claim when read in light of the specification. . Examiner respectfully disagree because the term "handling" is not defined in the specification anywhere. "Handling" data has a different meaning in the art than "writing" data, therefore the metes and bounds of the claim can not be ascertained.

### **Conclusion**

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO**

Art Unit: 2627

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
